

Lantra Awards Level 2 Award in Rodent Management

At a glance...

Qualification

Delivery Method:	Classroom
Recognised by:	This qualification is recognised by the Campaign for Responsible Rodenticide Use (CRRU) as acceptable at the point-of-sale for professional use rodenticides.
Prerequisites:	There are no formal requirements for entry onto this qualification however it is recommended that you undertake a relevant training course first such as the Lantra Awards Rodent Management training course.

Introduction

Successful completion of this qualification will enable you to purchase professional rodenticides (assessment by hard copy examination question paper).

Overview in brief

Following changes to the CRRU UK Code of Best Practice, training is no longer acceptable evidence of competence for the purchase of professional rodenticide.

People who wish to gain proof of competence will now need to pass a

regulated qualification such as the Lantra Awards Level 2 Award in Rodent Management. This

qualification is supported by a non-assessed training course in Rodent Management.

The finer details

This qualification is designed to be delivered alongside the Lantra Awards Rodent Management training course.

Upon completion you will receive an Ofqual accredited certificate.

This assessment can be delivered in three ways: by hard copy examination question paper, by online assessment, or remotely by online proctored assessment. This is the hard copy examination question paper version of the assessment.

Who should attend?

This course is for people who undertake management of rodent species in relation to pest control, in domestic, agricultural and business settings. This provides the proof of competence require to purchase professional rodenticide.

What will be covered?

The Learning outcomes for this qualification are:

- Understand the legislative requirements for rodent pest management
- Understand the reasons for control
- Understand Integrated Pest Management (IPM)
- Understand the biology and behaviour for a specific range of rodent pests
- Understand how to survey to assess the level of rodent infestation
- Understand how to apply an eradication campaign for the specific active rodent species
- Understand the control risk hierarchy for the control of rodent pests
- Understand how to monitor on an ongoing basis to manage future rodent activity
